

P-Noy fulfills promise of own homes for cops, soldiers

SOGAJO, Batangas—President Aquino yesterday delivered on his promise to make housing for police officers and soldiers one of his priorities when he led the groundbreaking for a housing project in Batangas today.

Mr. Aquino said the 37-hectare 4,000-unit Sogajo Hills project would ease the burden on policemen and soldiers who have had to make do with tents because they could not afford to buy their own homes.

"After we meet people in every province, there is now others in light-drug battle, who do we build? Do we not cover up our soldiers and policemen under these tents? But when they have prob-

lems, like housing, we don't do anything. This is the answer to their problem of increasing house rentals," he said in Filipino.

Early in his term, the President vowed to look into the housing needs of Philippine National Police and Armed Forces of the Philippines personnel.

Accompanied by Vice President Jejomar Binay and local officials, Mr. Aquino inspected two houses, both painted yellow.

Binay, who is the chair of the Housing and Urban Development Coordinating Council, said the project, undertaken by the National Housing Authority, was part of the plan to provide 26,000 houses

for PNP and AFP personnel. The project sites are in Batangas, Laguna, Marikina and Cavite.

He said the government was on track to exceed the target as some 21,800 houses would be completed and turned-over to police officers and soldiers by November.

He said the houses come in two designs, worth P175,000 and P200,000, payable in 30 years. Each house comes with a P10,000 government subsidy.

Some said beneficiaries will pay either P300 or P400 monthly amortization in the first year. The loan, he said, comes with a 6-percent yearly interest. *Correspondents: Marikina, Singapore, Central Luzon*

DPW: BALIKBAYAN PASALUBONG PACKAGE

Hanggang Balikbayan Box na lang ba ang mapapasalubong mo sa kanila?

Pagpipigil sa mga mahal na mga kahalagang pangkalakal, pagpipigil ang hanggang sa hanggang hanggang hanggang pangkalakal.

Power Life introduces the **Balikbayan Pasalubong Package**, a comprehensive financial plan for OFWs to help protect, manage, education, retirement, investment, a health plan, life savings and inheritance by central life.

Kaya hanggang ka magandang sa mga mahal na mga kahalagang pangkalakal, pagpipigil ang hanggang pangkalakal.

Among plano mo? Usap nayo.

TAKE 1
on ENDERMOLOGIE!

Slimmer, smoother and cellulite-free — all possible with Marie France's ENDERMOLOGIE.

- Target stubborn areas and eliminate trapped fat
- Smoothen cellulite dimples leaving your skin ripple-free and softer
- Tighten flabby sagging skin from weight changes and pregnancy
- Reduce inches where you want to without losing the curves

Change the contours of your body and get the body you want.
No risks. No scars. No regrets.

Call 894-BODY (2639)

marie france

Say hello to a slimmer, smoother you with **ENDERMOLOGIE!**

90% of all women have cellulite on some part of their bodies. In fact, older women have "orange-peel" cellulite too. That's because the deepest, most intense wrinkles and even blemishes cannot remove ugly cellulite. Get Endermologie — the first FDA-approved solution for cellulite reduction!

HOW DOES ENDERMOLOGIE WORK?

Endermologie uses a patented mechanism of infrared and optical action that applies deep action on fatty tissues. The continuous action of rollers break deep tissues that have been trapped in fat, making it smooth and mobile again. Amazingly, it also reduces inches in your problem areas! You can bid adieu to pudgy cellulite and extra inches with this relaxing treatment!

HOW LONG DOES THE TREATMENT TAKE?

It only takes 15 minutes to treat each target area! Absolutely no downtime. You can go back to your usual activities right after the session.

WHAT RESULTS CAN WOMEN EXPECT FROM ENDERMOLOGIE?

Skin texture will be smoother, tighter with reduced cellulite. You'll be amazed when you fit into those tight-fitting jeans effortlessly!

IS ENDERMOLOGIE SAFE?

It's absolutely safe. Women who tried it have said that it's just like getting a deep-tissue massage. They also feel an increase in energy and an overall feeling of relaxation.

Call now and get a **FREE** body fat analysis!

Project perils Metro bird sanctuary

From page A1

Opponents of the proposed 14,000-acre project have said that although the central location would be ideal, the project would be too large to be built.

"The central location would be ideal, but the project would be too large to be built," said Strauss-Kahn.

A highway linking the new Metro station with the rest of Metro would also cut through the sanctuary, which would be a major problem.

Habitat's integrity
The road would block the birds' view of the sanctuary and destroy most of the high-quality habitat for birds.

Chad of the Philippines
But the Philippine government has said that the project would be too large to be built.

"The project would be too large to be built," said Strauss-Kahn.

A highway linking the new Metro station with the rest of Metro would also cut through the sanctuary, which would be a major problem.

Habitat's integrity
The road would block the birds' view of the sanctuary and destroy most of the high-quality habitat for birds.

But when the project began in the 1980s, the area was a wetland and the government planned to build a road through the area.

"The project would be too large to be built," said Strauss-Kahn.

A highway linking the new Metro station with the rest of Metro would also cut through the sanctuary, which would be a major problem.

Fungus is key to UPLB's ambitious greening plan

By Kristine L. Abad

THEY may be invisible to the eye, but the microscopic fungi spores used by the University of the Philippines-Los Baños (UPLB) to re-plant forests have the strength to keep alive millions of trees.

A fungus-based fertilizer called Triflexin, which was developed by UPLB researchers, is the secret ingredient of the greenery project. Available in dry granules, the product, which aims to recover eight million hectares of degraded forests, Environment Secretary Ronson Peralda said.

"We will use truffles for the seeds and seedlings to grow," Peralda said in the speech at the launch of the program in the week.

The Department of Environment and Natural Resources (DENR) said they were approximately eight million hectares of forest land that were degraded, open, damaged or degraded.

If the current reforestation average of 30,000 hectares per year is not accelerated, it would take 200 years to rehabilitate the eight million hectares, Peralda said. The program is called because the government had agreed to the law, he added.

So Malabon will help in financing the rehabilitation of Philippine forests and ensure that seedlings would take root and grow, he said.

According to Peralda, Malabon helps recover the forest and aids in the survival of seedlings against the elements and diseases.

In a statement, UPLB Director Luis Benito said the microscopic fungus will "allow the protection of the low survival of trees." The government, he noted, has begun the mass distribution of planting materials to enable impoverished upland communities to live more responsibly in the environment.

According to the UPLB director, the fungus contains a species of fungi called truffles, a fungus that grows in the soil, which helps the plant's absorption of water and nutrients.

The fungi can also prevent root rot, which is caused by a fungus that attacks the roots of trees, and a life of the forest floor will maintain the soil's fertility, he added.

Malabon is also a commercial product. The company said it employs about 100 people in the plant, which is located in the Philippines and has a long history of producing organic fertilizers.

Malabon said it employs about 100 people in the plant, which is located in the Philippines and has a long history of producing organic fertilizers.

Trader files raps vs bank over bounced check

THE OWNER of the Green and Malabon branches of the country's first bank in addition to a complaint against Citibank, M.A., is allegedly filing a check to be filed in court.

Complaints filed against Citibank, M.A., who owns the Philippine National Bank in Manila, and Green and Malabon, who owns the Citibank branches in Manila, are being filed in court.

The check, he said, for P2 million, was for the purchase of a condominium. It had been filed in court by the bank, he said.

The bank, he said, had filed the check in court. He said he had filed the check in court.

Under the program, when the bank is not a member of the bank, it is not a member of the bank. He said he had filed the check in court.

Environmentalists oppose Subic coal-fired plant

By Robert Segura
Aspirant General Issues

ELIM: MAY TREASON?—Environmentalists are opposing the construction of a coal-fired power plant here, citing its harmful effects on the environment and on existing communities.

In El Lim, 20 km. from Agaña, American Oils, climate and energy campaigner for Greenpeace, said officials of the Subic Bay Metropolitan Authority (SBMA) have "acted in a very untransparent way," in "pulling the wool" over the truth about high emissions at a site

concerned that the plant will avoid these plants that ultimately suffer the negative impacts from the use of coal.

Greenpeace, an independent global organization campaigning to protect and conserve the environment, has established coordination with local organizations to stop the coal-fired plant project.

In attempt to stop the establishment of the plant, his gathered members at Manila Power Corp. (MPC) announced in March 2010 that it was planning to build a coal-fired power plant in the area.

At the time, the plant was planned to be built in the area of the plant, but the plant was not built. The plant was not built because of the opposition of the local community.

Carlito Villalita, 36, plans to sue the SBMA and MPC for "unlawful construction" of the plant, which he said is "a violation of the law." He said the plant is "a violation of the law" because it is "a violation of the law."

He said the plant is "a violation of the law" because it is "a violation of the law." He said the plant is "a violation of the law" because it is "a violation of the law."

He said the plant is "a violation of the law" because it is "a violation of the law." He said the plant is "a violation of the law" because it is "a violation of the law."

He said the plant is "a violation of the law" because it is "a violation of the law." He said the plant is "a violation of the law" because it is "a violation of the law."

He said the plant is "a violation of the law" because it is "a violation of the law." He said the plant is "a violation of the law" because it is "a violation of the law."

He said the plant is "a violation of the law" because it is "a violation of the law." He said the plant is "a violation of the law" because it is "a violation of the law."

plant in the country, says in Subic and the other in Davao.

The proposed Subic plant project is being administered by the Subic Bay Metropolitan Authority (SBMA). The SBMA is a government-owned corporation.

SBMA, however, said, "The SBMA is a government-owned corporation. It is not a government-owned corporation. It is not a government-owned corporation."

SBMA, however, said, "The SBMA is a government-owned corporation. It is not a government-owned corporation. It is not a government-owned corporation."

Diokno goes on leave; Leviste clears prison officials

From page 61

many of them invited to shed not right? Can they still be as honest or is it necessary for them to be involved?"

He added, "I'm hoping the DOJ in its report will be as comprehensive as possible and open up all the internal records on the rules and regulations governing prisoners supervised by this living-in-prison policy."

Why not resign?

Justice Secretary Leila de Lima yesterday said she had asked Diokno to resign to let him go. Aquino knew any political backlash as a result of Leviste's "prison break" on May 10.

De Lima said she carefully asked Diokno during their one-on-one meeting on the DOJ at least if he was considering quitting his post.

"No thinking of the President... so should have been in that meeting because this is becoming an issue to handle today and not the President to deal with," Diokno replied.

When the idea of the President's political Diokno would consider resigning, she added.

Justice President Alan Reyes said she said Diokno should resign.

"I want to make a decision to let him go," Diokno said at a press conference. "This is not about moral responsibility. It's a question of who is responsible for the decision... He cannot put the body to anybody."

Justice President Alan Reyes said "Leviste personally is not

Judge named to handle new Leviste charge

THE METROPOLITAN Manila Trial Court (MTC) has assigned Presiding Judge Antonio Leviste to handle the "revelation of secret of justice" case against justice Secretary Leila de Lima and his former aide, Diokno.

Diokno, an associate counsel to former Vice President Juan Ponce Enrile, is charged with leaking confidential files to Leviste.

In the court file, Diokno is charged with leaking confidential files to Leviste. Diokno is charged with leaking confidential files to Leviste. Diokno is charged with leaking confidential files to Leviste.

to be charged from his 30-minute meeting with De Lima.

Although Diokno refused to speak beyond immediately De Lima and Diokno are "not talking" with a prosecutor.

"It would be right to consider it. But for now, he said he would stand by his position. He said he is willing, ready and will be able to prove that he was not aware of his actions," De Lima said.

"She discussed with the last secretary of justice's previous resignation, stating that would be 'prosecution' once it would all depend on the findings of the DOJ investigating panel."

In his letter to De Lima, Diokno expressed his regret for his resignation. In the letter, he said he decided to go on leave "to give a free hand to the fact-finding body to determine the extent of liability among the court officials in connection with the Leviste incident."

"This way, people will not think that I am influencing the outcome of the investigation. Moreover, I believe more to make sure," he said in his letter dated May 21, which was received by De Lima's office yesterday.

Bishop urges faithful to heed the voice of conscience

By Joseph R. Uy

A CATHOLIC bishop close to the Philippine government yesterday urged officials not to look at the Catholic Church as an obstacle to progress but as a "partner" promoting the child's best interests in the government's reproductive health (RH) bill.

In his first personal letter on the family planning measure, Lingayen-Dagupan Archbishop Salvatore Villalpando urged the Catholic faithful to remain in the voice of conscience to explain their stand and voice their opposition with clarity.

The bishop's letter is part of a series of letters to the faithful, urging them to remain in the voice of conscience to explain their stand and voice their opposition with clarity.

"In this highly divisive time, the Church is called to a more profound role than ever before, protecting the children from present dangers and moral risks which will not be bettered children are not made to be," said Villalpando, who is also dean of the Cebu diocese and Cebu Archbishop.

"The Catholic Church throughout its 2,000-year history in the world and almost 600 years in the Philippines has proven itself as a partner against the Catholic faithful. It is the voice of conscience to explain their stand and voice their opposition with clarity."

Obama challenges Israel to make hard choices

Obama and wife Michelle leave the Air Force One on May 22 en route to Doha, Qatar, the first leg of a four-country Europe trip.

WASHINGTON—President Barack Obama took a hard line at Prime Minister Benjamin Netanyahu's speech to Congress last week, challenging his stance that calls for a settlement now should be secured on Israel's 1967 borders, along with expanded land swaps, and challenging him to "make the hard choice" necessary to bring about a two-state peace.

Obama's speaking before members of the influential bipartisan House-Pellon-Rohrabacher Committee, offered familiar assurances that the United States commitment to Israel's long-term security was "unshakable." But during the meeting, Obama's words were interpreted as a call for Israel to make a hard choice to achieve peace, Obama said. The world, he said, "is moving too fast."

Administration officials said it would be up to Obama, during his visit to Israel in July next week, to make his position clear in his own words.

Obama's speech was a surprise, given that he had already indicated that he was leaning toward such an outcome.

Obama said, "I can continue to find my way to the finish line, but if you give me nothing to work with, even tomorrow you give me, and I don't know if I can keep going."

The administration's stance was seen as a challenge to Netanyahu's position. Netanyahu said he would not back down from his position, but he would be open to a two-state solution.

agreement between the Israeli and Palestinian sides after the 1973 war, with mutually agreed land swaps, as a basis for peace.

Former Prime Minister Ehud Olmert of Israel, in fact, made such a proposal to the president of the Palestinian Authority, Mahmoud Abbas, in 2008, as the two sides rushed to complete a peace deal before Bush and Olmert left office.

But the 1973 war has been at least twice privately understood, not openly publicly and certainly not publicly endorsed by a strong US president.

When Obama did so last Thursday, he indicated a historic moment. Netanyahu, the prime minister of Israel, said in a statement in advance of his meeting with Obama that the day he met with Netanyahu was his "most important day as president of the United States."

"That was 1973 over the top," one administration official said Thursday, referring to Netanyahu by the nickname "Bibi," which has been the president of the United States.

Seeking to disrupt protesters, Syria cracks down on Internet

THE SYRIAN government is cracking down on protesters' use of social media and the Internet to promote their cause. It has taken steps to shut down the Syrian Arab Republic's Internet access, according to Syrian activists and digital privacy experts.

Syrian officials are warning on multiple fronts—a demanding crackdown from over their Facebook profiles and shutting off the 3G mobile network at times, disrupting the ability of protesters to upload videos of protests to YouTube, according to several activists in Syria. They are also warning President Bashar Assad, calling him a tyrant, and the Syrian government, warning of the country's civil war.

"They are using these tactics to cut off communication for the people," said Dr. Fadi al-Hadi, director of the Damascus Center for Human Rights. He said the Facebook page of at least two dozen activists had been recently blocked and new Internet connections are being monitored.

With foreign protesters banned from the country, activists have been working with cyber and social media to spread their message and to draw global attention to the civil war.

protesters, who have been told that the people and the Internet are not for them. The Syrian government is cracking down on protesters' use of social media and the Internet to promote their cause.

"The only way we can take action is through the Internet," said Ahmad al-Hadi, a Syrian activist based in Istanbul who was one of several Syrian activists to help in the delivery of satellite phones, cameras and laptops into the country earlier this year. "Without them, we would not have anything."

While Facebook has proved to be a powerful platform for activists to help mobilize protests and broadcast their struggle in Syria, Egypt and now in Syria, it also has proved to be a powerful platform for the Syrian government to crack down on protesters. It has blocked the Facebook page of at least two dozen activists and has recently blocked and new Internet connections are being monitored.

With foreign protesters banned from the country, activists have been working with cyber and social media to spread their message and to draw global attention to the civil war.

told him, as that I didn't have a Facebook account, he told me, after he posted me in the line. But he said I had one because they were watching me. Had some more or not? He said, "I know that they're watching me."

The man, who asked that his name not be used because he was afraid of being caught, said he was in his late 30s, grew up in Damascus and spent two months in jail. When he was released, he said that he found pro-regime content on the Internet, but he was not a Facebook user. "I immediately created a new account with a fake name and so did not get caught," he said.

Another man, living in Syria, who is in his late 20s, said he was a Facebook user. He said he was a Facebook user and he was a Facebook user and he was a Facebook user.

Boracay International Dragon Boat Festival marks 5th year

Boracay's annual international sports fest brings countries together

By David Santos
 Contributor

BORACAY once again hosted the biggest international water sports event in the country, the Boracay International Dragon Boat Festival held April 28-30, sponsored by the Department of Tourism, organized by the Boracay Island Paddlers Association (BIPA).

More so in 2016 year, the event is bigger and the competition is tougher. Teams from around the world and all over the country made their way to the island of beauty to participate in the event.

Competing teams were the Boracay All Stars, the Philippines Navy Dragon Boat Team, International Park Soccer (IPS), England of New America, Filipino Dragon Boat (Filipino), Tula's Dragon Boat Racing Team, Boracay Islanders, Guardians of Boracay, and others. Hundreds of locals and tourists flocked to the Boracay Regency Beach Resort and Convention Center to witness the event.

The Philippines team grabbed the first place again in the 500m men's division, with the Thai Masters finishing second for the second straight year. Boracay Islanders came in third and Boracay Islanders fourth. The women's 500m event went to Filipino Sam Dragon followed by Tula's and IPS. The 500m mixed division had

Experiments in telepathy from outer space

ONE of the most common and most easily demonstrated psychokinetic abilities of man is telepathy, which can be defined as the mental process of transmitting an incoming thought without the use of any physical medium.

The existence of man's telepathic powers has been scientifically demonstrated beyond doubt by Dr. JH Mitchell of Yale University in North Carolina after more than 25 years of meticulous laboratory experiments involving hundreds of subjects.

In Dr. JH Mitchell's experiments, both the transmitter and receiver were facing each other without seeing what the other was transmitting. They were separated only by a wooden wall. In the question that has often been raised is whether telepathic signals can be transmitted over long distances. Or is there a limit to how far telepathy can go?

This question was answered by scientist Edgar Mitchell,

who conducted an extraordinary experiment in telepathy while in outer space.

Sealed envelope

According to the story I read about this recent experiment, before Edgar Mitchell left for the moon in the Apollo 16 spaceship in 1971, he gave a sealed envelope to a scientist friend with the instruction not to open it until he returned to earth.

While in outer space, Mitchell, who holds a doctorate degree in science, transmitted a telepathic message to four individuals on earth, three of them received the message correctly. According to the story, one of these is where the message was transmitted was the well-known broadcast personality Chet Zimman, who was then living in Chicago. This was the same person whom former President John F. Kennedy asked to help him find the hidden Tombrich treasure.

INNER AWARENESS

Arthur J. Zimman

Can signals be transmitted over long distances?

I had the privilege of meeting Zimman personally in 1978 in 1979. I asked Chet if it was true he was one of the recipients of the telepathic message that scientist Mitchell transmitted while he was in outer space. And he confirmed to me the story was true.

I asked him what the message Mitchell transmitted to him was. He replied that it was the symbols on the Outer card, which Dr. JH Mitchell used

in his ESP experiments at Yale University. The Outer card symbols consisted of a cross, star, wave, circle and square. Zimman told me he got all the symbols correctly, and in the case of scientist Edgar Mitchell had sent them.

That was not exactly the way Mitchell recalled it in his book "Psychic Exploration: A Challenge to Science." According to Mitchell, "The reader must be critically significant, not because any of the recipients got a large number of correct hits, but because the number of hits was amazingly low. The statistical probability of getting so few hits was about 3000:1."

This negative ESP effect, called PSI blocking, is something that has frequently shown in other people's research work, and theories are being developed to explain it. In my case, it others good evidence for PSI blocking. The laws of chance are beyond his significant degree. Later experiments by other

researchers, similarly those conducted by American sailors aboard the USS Intrepid in the Pacific, proved telepathic communication can be carried on over very long distances. ("One Thousand Thoughts Through Space," published by Pocket Books, New York, 1975).

So the program, as Mitchell noted and related in his book, "Psychic Exploration," was a profound shift in consciousness. "The original was in me," said Mitchell, "and I recognized the validity of the institutional cognitive process."

Ignored by mainstream science

After he left NASA, Edgar Mitchell founded a scientific research organization he called the Institute of Noetic Sciences, which encourages and rationally explains those areas of knowledge and philosophy.

science traditionally ignored by mainstream science.

In the early '60s I had the great privilege of being invited to address the students of the Institute, then based in San Jose, California, about my research on brain healing and psychic surgery in the Philippines.

Edgar Mitchell admitted that as he derived insight into psychic research and parapsychology his initial skepticism began to fade. He, a student of science, he said, "believe things, something in the universe that is a source of knowledge."

The next Basic ESP Development Seminar will be held June 2-3, 4 a.m. - 2 p.m., while the business, Kari and Michael's seminar will be on June 18, 1 p.m. - 7 p.m. For more info call: (813) 722-1111 or (813) 722-1111. Email: jason@noetic.org. Website: www.noetic.org.

\$10,000 grant supports osteoporosis study in PH

PONTERA AND the International Osteoporosis Foundation (IOF) awarded the Osteoporosis Society of the Philippines (OSOP) with the first IOF-Asean Nutrition Research Award for Bone Health Campaign Grant this week in Manila.

Presented at the IOF World Conference on Osteoporosis Prevention, Diagnosis and Treatment, the grant aims to support the work of the OSOP to improve the prevention, diagnosis and treatment of osteoporosis in the Philippines.

The IOF-Asean Nutrition Research Award for Bone Health Campaign Grant is part of an ongoing partnership between Pontera and the IOF, aimed at promoting awareness of osteoporosis across the region. "This is the first time we have awarded such a grant in the region and the world," said Josefine Tiedt, senior health program manager, Pontera Research Asia and Middle East. "This demonstrates that there is real desire in Asia to build upon existing programs and develop new capabilities around osteoporosis research, its diagnosis and treatment, its prevention and its management."

OSOP is a non-profit organization that aims to reduce the burden of osteoporosis in the Philippines. It is a member of the IOF, which is a global organization that aims to reduce the burden of osteoporosis worldwide. OSOP is currently conducting a study on the prevalence of osteoporosis in the Philippines, which is the first of its kind in the country. The study is funded by the IOF-Asean Nutrition Research Award for Bone Health Campaign Grant.

WORKING green gardens are common features at Ayala Land's Green City. Ayala Land's latest mixed-use development is now the first of its kind in Mindanao.

Ayala and Floirendo team up for Davao's biggest mixed-use mall

AMBITIOUS mall continues the best features of Ayala Land's earlier mall developments with more features and amenities that go well with its target market.

NATIVE women showcase indigenous fabrics.

From page 10

Ayala, which has brought in such brands as Huggies, Aftershave, Panty Wipe, Sunscreen and Charcoal.

It is not in spirit those areas such as Kitchens, Lanes, Springfield, Johnson and Johnson.

Shawn Lim, VP of Super Corp., shared Floirendo's optimism. Apart from Super and Home, Super has brought in such brands as Kitchens, La Senza, Aldo, Charles & Keith, Mulberry, The Face Shop, and even a South Sea Salon.

"Next to Cebu, Davao is the biggest market outside Metro Manila and is bigger in Mindanao," said Lim. "Hopefully it will draw people from nearby cities like General and Cotabato to come and shop here as well."

"We have to work," said Floirendo, president of Philip Plaza in the Philippines. "We've had stores in Davao before selling Philip Plaza, but not an exclusive boutique dedicated solely to the brand, until now."

Ayala also has the first Starbucks center in Davao. Apart from established brands and local brands, the mall is now home to several homegrown restaurants and boutiques such as Bismark's, Bisco, Tino and Janel's. Owners of these popular stand-alone establishments decided to re-locate and take advantage of the mall concept.

Homegrown

Even before the mall, Ayala has expanded its reach with the opening of its first outlet in Davao City. Other prominent Cebu-based brands in Ayala include Lovable, Penetration, Oxygen, Puro and Lovable. Similarly, along with homegrown restaurants from Cebu, Ayala City such as Bismark's Grill and Gula Gula.

Collectively, the mall, residential towers, office building and hotel will be located in Ayala's TechnoPark. Bismark's Hotel is expected to be finished later this year, while the residential towers and office building are set to be completed sometime next year.

Following the completion of its earlier developments in Cebu and Quezon City, ALI is also in talks with several business process outsourcing companies to have their center as one of its anchor tenants.

"It takes time in being able to know the market and understand its needs while keeping the concept relevant in addressing the community," said Carlos Dizon, ALI's VP for business development and strategic planning-commercial business group.

Ayala is said to be a part of some of the last features of ALI's earlier malls such as the new, Gloria and, of course, award-winning GreenCity.

"There and some other areas are already landmarks of an Ayala development," said Dizon. "We also made sure

THE mall's four-class multiple use features and is available online for "buy-sell" items.

GREEN City Mayor Sara Duterte-Carpis (left) and the commercial group in mind the official opening of Ayala Land's Green Square. From left: Zaldy de la Cruz, Floirendo, Zaldy de la Cruz, Vice Mayor Sara Duterte-Carpis and Vice Mayor Floirendo.

there are enough pedestrian bridges to make it convenient for shoppers."

And since Davao is still a relatively unspoiled garden city, ALI decided to build an open-air food court overlooking an open area. Thanks to prevailing winds and the mall's design, the food court is designed to be a pleasant surprise throughout the day even without an air conditioning.

"Whether we envisioned really happening," said Carlos Dizon, ALI's VP for operations-commercial business group. "That's one thing which makes us happy about this development. We want to give people a new way to live the best system."

A mall garden showcasing Davao's natural beauty is now open in the park. With the introduction of these features, ALI executives are now taking inspiration from previous projects like the Ayala Center in Manila.

"Gloria doesn't have a mall garden in present, but we're planning one in the new Gloria," said Dizon. "Each mall has its own design. It evolves on its own, depending on what's good and correct in the current phase."
